WORK EXPERIENCE

Frontend Developer Intern — Jul 2025 – Dec 2025

Gaspar AI - Athens, Greece

- Improved UI/UX of a production level **Admin Portal** and commercial web application using React, TypeScript, and Tailwind CSS, enhancing usability and overall user experience.
- Built and deployed a full documentation platform (**34+ pages**) as the sole developer using Docusaurus, including Help Center content and **27+ integration guides** (Atlassian, Okta, ServiceNow, PagerDuty, Sentry). docs.gaspar.ai ↗
- Designed and implemented a **Chat Virtual Assistant widget** using Zustand and custom React hooks as a prototype feature for potential client integration. Live ↗
- Delivered features in a production environment through **CI/CD pipelines** using GitHub.
- Collaborated in a **5-person agile team** using Git, GitHub, Jira, and Slack, contributing to feature development and debugging.

PROJECTS

Atrani Admin Panel & Store - Full Stack Platform Admin Live | Store Live | Repo

TYPESCRIPT · REACT · TAILWIND CSS · NODE.JS · POSTGRESQL · CYPRESS

- Real-time admin dashboard with **invitation system**, role-based **JWT access** control, and **analytics overview**.
- Stock tracking, product management, and real-time alerts.
- Store with **Google OAuth**, email verification via Brevo, product browsing, filtering, and **cart functionality**.
- **Cloudinary** image management and RESTful backend with **28 API endpoints** across auth, products, users, and admin modules.
- Full **E2E test coverage** with Cypress (login, cart, checkout, admin flows).

PortfoliOS+ Live | Repo

REACT · TYPESCRIPT · CSS3 · ZUSTAND · CYPRESS

- OS-like portfolio simulating a **desktop in the browser**, built with a custom **useDraggable** hook for drag/resize logic, **Zustand** for global state management (window manager, audio), and a multi-step **state machine** boot sequence.
- Full **E2E test suite with Cypress** covering OS interactions (window management, taskbar, file navigation, and shutdown flow).

Grill Gamers YouTube Bot Repo

NODE.JS · YOUTUBE DATA API · DISCORD WEBHOOKS · UPSTASH REDIS

- **YouTube bot** that monitors channels for new uploads by fetching data from the **YouTube API** and automatically posts notifications to Discord via webhooks.
- Built with **Node.js** and **Upstash Redis** for caching and preventing duplicate notifications, deployed on **Render** with live **YouTube API** integration.
